

EDUARDSON CORTEZ

JUNIOR SOFTWARE DEVELOPER | FULL-STACK WEB DEVELOPER

eduardcortez05@gmail.com | siglatechsolutions.com | Philippines

Target: Junior Software Developer / Junior Application Developer | Available for onsite work after graduation in September 2026

PROFESSIONAL SUMMARY

Graduating BS Information Systems student (Cybersecurity Track) with hands-on experience in full-stack web development, HRIS and biometric attendance integration, REST APIs, PostgreSQL/Supabase, cloud deployment, testing, troubleshooting, and secure application practices.

Contributed to real OJT projects involving business workflows, dashboards, authentication, validation, and multi-device data flow. Interested in building practical payroll, HR, accounting, inventory, and other business systems.

TECHNICAL SKILLS

Languages & Frameworks	JavaScript, HTML, CSS, SQL, Python; TypeScript fundamentals; React/Next.js, Node.js, Django
Databases & Application Development	Supabase, PostgreSQL, Prisma basics; REST APIs, CRUD, authentication, RBAC, forms, dashboards, validation
Tools & Deployment	Git, GitHub, VS Code, Vercel, Render, Railway, Coolify/VPS, debugging, testing, documentation
Security & Quality	OWASP basics, CORS, security headers, secrets handling, audit logs, input validation, test-case preparation

PROFESSIONAL EXPERIENCE

Full-Stack Development / Cloud & IoT Intern (OJT) | NexVision Innovations Inc.

Marikina City, Philippines | May 2026 - Present (expected completion: August 2026)

- Contributed to frontend interfaces, backend APIs, database integrations, cloud deployments, testing, troubleshooting, and technical documentation for business applications.
- Built and tested Supabase/PostgreSQL features including forms, dashboard views, authentication flows, role-aware access, validation, and database-backed records.
- Assisted HRIS and biometric attendance workflows involving remote devices, centralized time-in/time-out records, API bridge services, logs, and cross-network testing.
- Supported GitHub-based deployments and security remediation involving secrets, CORS, security headers, token storage, input validation, and access controls.

Technical Operations / Building & AV Support | UP College of Medicine - HSS-MSB

Manila, Philippines | Previous role (approximately five years)

- Provided technical and operations support for classrooms, meetings, events, AV/Zoom setups, documentation, room scheduling, and issue coordination.
- Developed strong user support, clear reporting, troubleshooting under pressure, and stakeholder coordination.

SELECTED PROJECTS

HRIS / Biometric Attendance Integration Prototype | Supabase, REST APIs, Coolify, Railway, Vercel

- Assisted multi-device, cross-network time-in/time-out testing, centralized attendance-record flow, device-log analysis, API troubleshooting, and synchronization documentation.

Data Privacy Compliance Management System (Capstone) | Django, Python, Supabase PostgreSQL, Render, Chart.js

- Developed breach records, consent tracking, 72-hour deadline monitoring, audit logs, RBAC, PDF reports, dashboard analytics, test cases, and user documentation.

SIGLATECH Company Website | HTML, CSS, JavaScript, Node.js, Supabase/PostgreSQL, Vercel

- Built and deployed a responsive business website with service pages, portfolio content, inquiry workflow, database storage, privacy messaging, and secure form controls.

EDUCATION & TRAINING

Bachelor of Science in Information Systems - Cybersecurity Track | GK College of Business, Arts and Technology

Expected graduation: First week of September 2026 | Relevant coursework: Web Penetration Testing, Vulnerability Assessment, IT Security Risk Management, Cloud Cybersecurity, Python Programming, Network Enterprise Architecture

Training: Google Cybersecurity Certificate coursework; Google IT Support coursework; DICT Basic Python,

Certifications: TESDA NC2 – Computer System
